

# Meet the Kids

**Camden**

Camden is a young boy who was diagnosed with a serious heart condition and placed on the transplant list. He recently underwent a heart transplant at Lurie Children's Hospital of Chicago.

While recovering, Cam has received several cards from CFHK as well as autographs by Olympian Aly Raisman, CFHK athlete supporter. His family said the cards brought a smile to Cam's face and he really appreciated seeing them. Cam is still in the hospital recovery from complications. We are excited to continue to brighten Cam's day with cards while he continues his recovery at Lurie.

In 2020, Everly was diagnosed with Leukemia, and began treatment. Everly first received cards from CFHK in January of 2021 while at Shriners Hospital. Since then, she has received cards from CFHK regularly (both general & holiday cards), as well as autographs by CFHK athlete supporters such as Olympic Gold Medalist Aly Raisman, during her regular chemotherapy treatments. Everly's mom said receiving the cards always brings a smile to Everly's face and brightens her day. Her family expressed appreciation to all of our card-making supporters for helping brighten Everly's day. Everly recently completed her 2 years of Chemo treatment and is doing well. Her family is very thankful to CFHK and plans to make cards themselves to help pay it forward.

**Everly**

**Tyler**

Tyler is a teen boy who was diagnosed with a heart condition. He spent weeks hospitalized waiting for a heart transplant and then recovering after the transplant. Tyler first received cards from CFHK shortly after he was admitted to Lurie Children's Hospital of Chicago in January 2023. Tyler's mom said he loved the cards from CFHK, and it made him feel special to receive cards from all over the country as well as a card made the champion University of Florida Women's Gymnastics Team. During his time in the hospital, Tyler received both general and holiday cards from CFHK. These cards provided much needed encouragement to Tyler and his family. Tyler is now recovering at home and doing well!

Kylie was diagnosed with a serious form of childhood cancer, called rhabdomyosarcoma, in 2022. She is currently bravely fighting her battle against cancer and undergoing chemotherapy treatment at Children's Hospital.

Kylie was referred to receive a card by a family friend. Since then, Kylie has received several cards from CFHK. Her family expresses appreciation for thinking of Kylie and making her smile. Kylie's mom said the cards bring her joy and that she enjoys looking through each one. We look forward to continuing to support Kylie during treatment.
